Possible Side Effects (continued):

Diarrhea
What to do:
• Drink extra fluids if you have diarrhea.
• Call your doctor if you have runny or watery bowel movements more than 3 times per day, if it lasts for more than 1 to 2 days, or if you feel lightheaded or dizzy.

Jaundice
What this means:
• This medicine may increase your bilirubin, which can cause color changes to your skin or the whites of your eyes.

What to do:
• Call your doctor if you notice yellowing of your skin or the whites of your eyes.

Heart Changes
What this means:
• Your doctor may check your heart before you start this medicine and while you take this medicine.

What to do:
• Eat a healthy, well-balanced diet.
• Call your doctor if you have an abnormal heartbeat or shortness of breath.

This is not a complete list of all possible side effects. Tell your doctor if you have these or any other side effects that you think are caused by this medicine. Your James health care team will give you further help to manage side effects.

PATIENT EDUCATION

Taking Your Treatment Home
What you need to know about your Anti-Cancer Medicine

Ivosidenib (Tibsivo)
This brochure has important information on how to use, handle, and store your medicine, what side effects to look for and how to manage them.

What it looks like: Oblong tablets that are blue in color

How to handle and store:
• There are special safe handling instructions for this medicine. Talk to your doctor, pharmacist or nurse about the precautions you need to follow when taking this medicine.
• Store at room temperature in the original container. Do not transfer to a pill box.
• Keep the container tightly closed with the gel packet inside to keep the tablets dry.
• Do not store in your bathroom or in refrigerator.
• Keep this medicine away from children and do not share it with anyone.

The James
Filling your ivosidenib prescription:
- You will need to get your medicine from a specialty pharmacy that has Ivosidenib in stock.

How to take:
- Swallow the tablet whole with a full glass of water.
- Take the tablet at the same time each day.
- Ivosidenib can be taken with or without food, but should not be taken with a high fat meal.
- **Do not** chew, break, or crush tablets.
- **Do not** take more tablets than prescribed.
- If you miss a dose, take the dose as soon as possible on the same day. **Do not double your dose.**
- If it is taken close to the time of your next dose, skip the missed dose.

Disposal:
- Talk with your doctor or pharmacist about how to get rid of prescription medicines safely.

Precautions:
- Tell your doctor or pharmacist about any medicines you take, including prescription and over-the-counter medicines, vitamins and herbal products.
- **Do not get pregnant while on this medicine.** Talk with your doctor about what birth control to use.
- It is important to stay well hydrated while taking this medicine.

Possible Side Effects
You can find more information on side effects in the Patient Education booklet, *Treatment with Chemotherapy and Anti-Cancer Medicines*.

Differentiation Syndrome
What this means:
- This is a serious condition that may happen with AML treatments.
  - Fever
  - Shortness of breath or trouble catching your breath
  - Cough
  - Swelling of arms or legs
  - Fast weight gain (more than 10 pounds in 1 week)

What to do:
- Go to the nearest emergency room if you have any of the symptoms listed above.

Nausea and Vomiting
What to do:
- Call your doctor if you are unable to keep liquids down for more than 24 hours or if you feel lightheaded or dizzy.
- Take your anti-nausea medicine as you have been instructed by your health care team. Some examples of anti-nausea medicines are ondansetron (Zofran) and prochlorperazine (Compazine).
