Adult Comprehensive Sickle Cell Program

James Care East Infusion Center
University Hospital East - (614) 293-9441
181 Taylor Avenue, Columbus, Ohio 43203
Office Hours: Wednesday 8:00 a.m. to 4:00 p.m.

Important Information

- It is important to talk to your doctor about all your prescription needs during your regular clinic visits.
- Your pain contract from the sickle cell program will be used when you are treated in the day hospital.
- Tell your care team if you use alcohol or street drugs and if you are in a dependency program. For your safety, the care team needs to know...
about anything that may affect how your treatment works.

- Medicine given in the infusion center may make you sleepy. **For your safety, you must have an adult with you to drive you home.**
- The day hospital provides pain control for acute sickle crisis. Please respect a healing environment for all patients.

**Services Provided**

The day hospital offers the following services:

- Medical exam
- Blood tests and laboratory testing
- X-rays
- Intravenous (IV) infusion
- Blood transfusions
- Acute pain crisis management

**When to Call the Day Hospital**

- **During Normal Hours**
  You may call if you have pain or symptoms that are not controlled by your usual home medicines. **It is important to call before 3:00 p.m.** The staff will check to see if there is an opening at the day hospital. The staff will call you back to let you know if there is a same day appointment or a next day appointment available for you to be seen in the day hospital.

- **After Hours, Weekends or Holidays**
  After normal business hours, weekends or holidays, call your doctor’s office. The answering service will contact your doctor or the doctor who is on call. Please limit these calls to emergencies. Call during regular office hours for non-emergency questions.

**When to go to the Emergency Department**

Go to the nearest emergency department or call 911 for the following:

- Severe chest pain
- Shortness of breath or problems breathing
- Seizures
- Weakness or numbness in the arms or legs
- Severe headache
- Vision changes
- For males, an erection that lasts longer than 4 hours (this condition is called “priapism”)
