How to Get a Clean Catch Urine Sample (Male)

Follow these steps

1. Wash your hands with soap and water. Dry your hands well.
2. Get the urine sample kit. The kit has a cup with a lid and a packet of wipes.
3. Spread a clean paper or cloth towel out on a counter or surface you can reach from the toilet.
4. Open the wipes and place them on the towel.
5. Take the lid off of the cup. Put the lid flat side down next to the wipes. Do not touch the inside of the cup or lid.
6. Wash your entire penis with one wipe. Pull back on the fold of skin around the tip of your penis. Wash this area with another wipe. Throw away the wipes in the trash.
7. Start to urinate a small amount into the toilet. Urinate the rest of the urine into the cup.
8. Put the lid tightly on the cup. Be careful not to touch the inside of the cup or lid.
9. Wash your hands with soap and water.
10. If you are in the hospital, call the nurse to take the fresh specimen. Do not allow the sample to sit in the room.
   If you are at home, put the cup in a plastic bag and put the bag in the refrigerator to keep the sample fresh. Take the sample with you when you go to the laboratory or doctor’s office.

Talk to your doctor or health care team if you have any questions about your care.
