Outpatient Lodging: Allogeneic Blood and Marrow Stem Cell Transplant

If you live more than 1 hour away, you may need to stay in the local area for follow-up care after your allogeneic stem cell transplant. The length of time you will need to stay in the area depends on how quickly you recover from your course of treatment. You should expect to stay in the area for 4 to 8 weeks after your discharge from the hospital. You and your doctor will determine when you may return home.

Local Lodging Assistance

The hospital has agreements with local hotels for reduced rates. These hotels are close to the hospital, have kitchenettes, and provide shuttle service.

Some health insurance plans may help cover the cost of travel and lodging. We encourage you to check with your insurance company about what your plan covers. The James Patient Experience Department and other community resources may also be able to help with the cost of lodging, based on your financial need. Talk with your social worker for more information about outpatient lodging.
